Bioinformatician/Scientist

TERM OF EMPLOYMENT:

Full-time (1.0 FTE), Temporary (6 months)

COMPANY PROFILE:

Bold Therapeutics is a clinical-stage biopharmaceutical company founded in 2018 by a team of industry veterans to develop and commercialize BOLD-100, a first-in-class small molecule therapeutic. BOLD-100 works through modulating the ER stress response and significantly enhances the activity of a wide range of other therapies both in oncology and, more recently, in infectious diseases. BOLD-100 is currently being tested in clinical trials in combination with FOLFOX for the treatment of advanced gastrointestinal cancers. BOLD-100 is also being tested as a potential therapeutic for COVID-19, and in December 2020, Bold Therapeutics was one of four therapeutics companies selected by the Canadian government for COVID-19 funding and support. Bold Therapeutics is a small, dedicated team of industry experts looking to make a difference by rapidly developing this novel therapeutic.

SUMMARY:

Bold Therapeutics is looking to hire an entry-level bioinformatician/scientist on a temporary (6 month) full-time basis, with the possibility of a contract extension depending on company needs. The successful candidate will support Bold Therapeutics' preclinical oncology team offering bioinformatics expertise to analyze large and complex datasets to advance the understanding of the Company's lead asset, BOLD-100. This role requires independent judgement and subject matter expertise. The successful candidate will be enthusiastic about working in a small biotech environment and able to work in an exciting fast-paced environment. This position is remote (e.g. work-from-home).

POSITION DESCRIPTION:

The successful candidate must have strong skills and experience in bioinformatics, computational biology or a related field, preferably with some background in life sciences and oncology. Additionally, the candidate must be self-motivated and have demonstrated ability for problem-solving. The ideal candidate will have sound analytical skills, prior experience in handling large datasets, working with high-throughput biological data and proficiency in at least one common coding language (R and Python preferred). This position requires a high level of organization and a proven ability to work both independently and as part of a multi-disciplinary team. The right candidate should have a flexible approach and willing to support other non-bioinformatics projects as and when required.

Specific

- Work in collaboration with the preclinical research team to analyze large and complex datasets using bioinformatics tools, including cell line screens;
- Advance the goals of the preclinical research team by researching and identifying appropriate analyses to be performed;
- Extract data from online databases, write codes for bioinformatic analysis, develop a pipeline for data analyses;
- Draft reports of the analyzed data and present to the internal team on a regular basis; and

- Provide additional support in non-bioinformatics projects as and when required

REQUIRED TECHNICAL QUALIFICATIONS

- A graduate degree (MSc or PhD) in an appropriate field
- Experience in bioinformatics, computational biology or related field
- Demonstrated ability to analyze high throughput biological data
- Proficiency in R and Python
- A good foundation in statistical analysis is preferred
- Canadian citizen or resident, and legally allowed to work in Canada. Candidate must be residing in Canada.

LANGUAGE REQUIREMENTS

Fluent English

DESIRED START DATE

April 1st, 2021

LOCATION OF WORK/WORK FROM HOME

Due to the COVID-19 pandemic, Bold Therapeutics is currently operating semi-virtually, and the successful candidate will work remotely.

COMPENSATION

Compensation commensurate with experience

COMPANY

Bold Therapeutics Inc.

BUSINESS ADDRESS

850 West Hastings, Suite 515 Vancouver, British Columbia, Canada

HOW TO APPLY

If this opportunity matches your character, experience, and skill set, and you would like to work in an exciting and dynamic team developing innovative therapeutics, this position is open, and we are looking for the right candidate. Please email a cover letter and your resume with the subject line 'Bioinformatician / Scientist – (Your Last Name)' to the attention of Paromita Raha at info@bold-therapeutics.com. Applications will not be accepted by fax or over the phone.

We thank all applicants for their interest in a position at Bold Therapeutics. We regret that only those selected for an interview will be contacted. Please note that we will not be fielding inquiries by phone.
